1 Main Page

The ‘main_page’ app in the Django project contains the following files and directories:

- `migrations/`: This directory contains the database migration files for the app.
- `static/main_page/`: This directory contains the static files for the app, including images and CSS files.
 - `img/`: This directory contains the images used in the app.
 - `style_about.css`: This file contains the CSS styles for the ‘about_us’ page.
 - `style_ind.css`: This file contains the CSS styles for the ‘index’ page.
- `templates/main_page`: This directory contains the HTML templates for the app.
 - `index.html`: This file contains the HTML code for the ‘index’ page.
 - `about_us.html`: This file contains the HTML code for the ‘about_us’ page.
- `apps.py`: This file contains the configuration for the app.
 - **MainPageConfig**: This class sets the default auto field and name for the app.
- `urls.py`: This file contains the URL patterns for the app.
 - `path(' ', views.index, name='index')`: This URL pattern maps to the ‘index’ view.
 - `path('about_us/', views.about_us, name='about_us')`: This URL pattern maps to the ‘about_us’ view.
- `views.py`: This file contains the views for the app.
 - **index(request)**: This function renders the ‘index.html’ template and returns the rendered HTML.
 - **about_us(request)**: This function renders the ‘about_us.html’ template and returns the rendered HTML.
