Contents

1 About site

The site was made to create polls and vote in them in order to finally decide what is what

2 Documentation for Directory Structure

2.1 Directory Structure

- `polls_site/`: This is the root directory of the Django project.

- `API/`: This directory contains files related to the API of the project.
  https://github.com/werent4/Polls_web_site/tree/main/documentation/API

- `documentation/`: This directory contains documentation files related to the project.
  https://github.com/werent4/Polls_web_site/tree/main/documentation/

- `main_page/`: This directory contains files related to the main page of the project.
  https://github.com/werent4/Polls_web_site/tree/main/documentation/main_page

- `polls/`: This directory contains files related to the polls app of the project.
  https://github.com/werent4/Polls_web_site/tree/main/documentation/polls

- `polls_site/`: This directory contains settings and configurations files for the Django project.
  https://github.com/werent4/Polls_web_site/tree/main/documentation/polls_site

- `users/`: This directory contains files related to the users app of the project.
  https://github.com/werent4/Polls_web_site/tree/main/documentation/users

- `manage.py`: This is the main entry point for executing Django commands.

2.2 Additional Information:

- `polls/`: The polls app is related to the functionality of creating and managing polls within the project.

- `users/`: The users app is related to the functionality of user management within the project.

- `main_page/`: The main_page directory contains files related to the main landing page of the project.

- `API/`: API directory contains files related to the API endpoints and functionality within the project.

- `documentation/`: The documentation directory is where documentation files related to the project can be found, such as user manuals, API reference guides, or technical documentation.

3 How to use documentation

Each folder in this directory contains documentation for the corresponding (named) application on the site.
In directory `documentation/prototype` you can find prototype of the site in `.pdf` or open it with `figma`
